PROFILE

Motivated and detail-oriented Artificial Intelligence and Data Science undergraduate with hands-on experience in full-stack web development, machine learning systems, and Generative AI technologies. Skilled in developing scalable MERN stack applications, AI-assisted workflows, secure backend systems, and ML-powered dashboards. Passionate about solving real-world problems using data-driven approaches and modern AI tools.

CORE STRENGTHS

- Full-Stack Web Development (MERN Stack)
- Generative AI & AI-Assisted Development
- Machine Learning & Predictive Analytics
- REST API Development & Integration
- JWT Authentication & Secure Systems
- Prompt Engineering & AI Workflow Design
- Problem Solving & Analytical Thinking
- Responsive UI/UX Development
- Database Management & Scalable Architecture
- Team Collaboration & Fast Learning

TECHNICAL SKILLS

Programming Languages: Python, C, JavaScript

Frontend Technologies: HTML5, CSS3, React JS

Backend Technologies: Node.js, Express.js

Databases: MongoDB, Firebase

Generative AI & Modern AI Tools: Claude AI, ChatGPT, MCP (Model Context Protocol), Prompt Engineering, AI Workflow Automation, AI-Assisted Coding Tools, Retrieval-Augmented Generation (RAG) Basics, LLM Application Concepts

Tools & Platforms: Git, GitHub, VS Code, Postman, Antigravity, Firebase Console

Concepts: REST APIs, JWT Authentication, MVC Architecture, Machine Learning, API Integration, Authentication Systems

INTERNSHIP EXPERIENCE

Full Stack Development Intern – SmartBridge

2025

- Built **Freelance Finder**, a MERN-based freelance marketplace platform.
- Implemented JWT authentication and role-based dashboards.

- Developed RESTful APIs and integrated MongoDB for scalable data handling.

Google Android Developer Intern – Edu Skills (Virtual)

2024

- Developed secure Android modules using Kotlin and Firebase.
- Followed Google-recommended UI standards and modular architecture practices.

MERN Stack Development Intern – Web Stack Academy

2025

- Developed **Homely Hub**, a home service booking platform.
- Created responsive UI components and REST APIs.

PROJECTS

Trust Hire – Local Job Recruitment Platform

2025

- Built a full-stack recruitment portal using the MERN stack.
- Implemented OTP-based authentication and employer dashboards.
- Designed scalable backend APIs and responsive interfaces.
- Developed job posting and candidate application management features.
- Integrated secure JWT-based session handling and protected routes.
- Optimized MongoDB queries for faster job and applicant retrieval.
- Enhanced user experience with responsive React-based UI components.

EduGuard AI – Early Dropout Prediction System

2025

- Developed a Random Forest-based machine learning model for dropout prediction.
- Designed analytics dashboards with explainable insights.
- Improved prediction visualization and reporting features.
- Performed data preprocessing, feature selection, and model evaluation.
- Achieved improved prediction accuracy using ensemble learning techniques.
- Visualized student performance trends using interactive charts and graphs.
- Enabled early identification of at-risk students through predictive analytics.

EDUCATION

Seshadri Rao Gudlavalleru Engineering College

B.Tech in Artificial Intelligence and Data Science

2023 – 2027

CGPA: 8.0

CERTIFICATIONS

- Google (Coursera) – Foundations: Data, Data Everywhere
- Infosys Springboard – Python Foundation Certification
- IBM – Artificial Intelligence Fundamentals
